# MODULE FOR SAMAACHAR

Amith Chandra
Department of Master of Computer Application
Visvesvaraya Technological University, Belagavi

**Abstract**

**News is a major source of communicating information to the people. The happenings around the globe will be collected and shown to the people. The information is conveyed through various media. It is also used as a platform to manufacture opinion for the population. People tend to believe that the information is true hence there must be a proper and neat communication of information.**

## I. Introduction

This system is about managing the different types of newspapers local, international, different languages, its inventory and account system. Samaachar is a circulation software and subscription management for newspaper and management for newspaper and magazine distributors. It is a multiple newspaper subscription. Management software system that handles both newspaper and magazine circulation. It is designed for small publishers and large home delivery and retail outlet distribution operations and will give the kind of control and need when you are responsible for the management and many different kinds of newspaper and magazine publication. The scope of Samaachar is in Newspaper field where the Newspaper is purchased and sold. The scope of newspaper agency is media. The scope of media is to provide the following features: A newspaper is a periodical publication containing news regarding current events, informative articles, and diverse features. Newspaper helps us to gain more knowledge about our society. Newspaper helps us to know about new things that are launched through advertisement.

## II. Literature Survey

News is a major source of communicating information to the people. The happenings around the globe will be collected and shown to the people. The information is conveyed through various media. It is also used as a platform to manufacture opinion for the population. People tend to believe that the information is true hence there must be a proper and neat communication of information. But currently the system is manual which makes the entire system complicated. Manual system is time consuming the output produced may not be accurate. It requires more effort from the people and people often tend to make mistakes

## III. Implementation

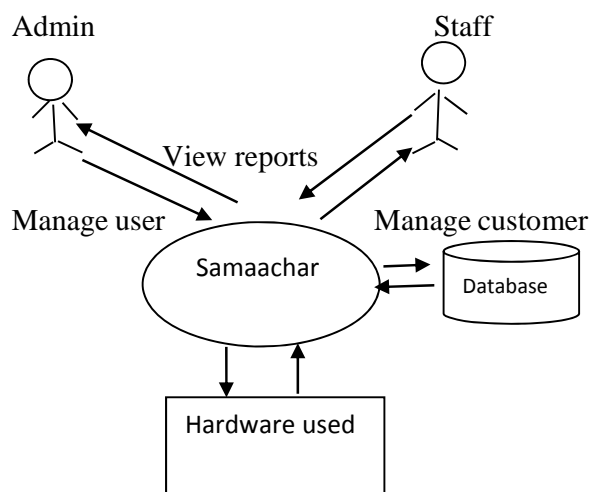

It holds good for Admin and staff where admin can register, add language or which newspaper or add whose is the category master any type of transaction and staff can keep track of purchase, stock ,customer return transactions. The scope of Samaachar is in Newspaper field where the Newspaper is purchased and sold. The scope of newspaper agency is media. The scope of media is to provide the following features: A newspaper is a periodical publication containing news regarding current events, informative articles, and diverse features. Newspaper helps us to gain more knowledge about our society. Newspaper

helps us to know about new things that are launched through advertisement.

### IV. Proposed System

To overcome these drawbacks the proposed system leads to implementing and then repairing way of building systems. Practically, this methodology may increase the complexity of the system as scope of the system may expand beyond original plans application may cause application not to be used as the full system was designed Incomplete or inadequate problem analysis.

Main objective of this project samaachar is to automate the news paper agency, inventory and accounts which is counted manually

This system is about managing the different types of newspapers local, international, different languages, its inventory and account system.

### V. Conclusion

Main objective of this project is to automate the news paper agency, inventory and accounts which is counted manually. This system is about managing the different types of newspapers local, international, different languages, its inventory and account system.Quicker user feedback is available leading to better solutions. Missing functionality can be identified easily. Errors can be detected much earlier. Thus would be of great help to the newspaper agency.
