Abstract

The Grace Ministry enables services like slum Ministry, Eunuch Ministry, Esther Ministry, Clean and Hygiene Camping for peoples who can get help from It . Users can request for prayers, Donate Blood. Donor can donate their money to poor, Educate a Child, Donate to Slum People. Users can also post the details of the poor or ill people who are suffering from major disease and can get help from Donor who can view those posts.

I. Introduction

The main objective of developing Grace Ministry is mainly for the users to get help from it by means of Retreats, Requesting Prayers, Counselling, Healing Oil, Charity etc. Grace Ministry provide help for slum people, transgender people, it also provides donors to educate a child.

Users can view Saint of the day, Testimonials, News and Social Events conducted by Grace Ministry, Articles, Daily Devotion written by Bro Andrew Richard, Women Devotion written by Sis Hanna Richard, Photo Gallery of Grace Ministry, View about Bro Andrew Richard etc. Admin should login with his Email and Password to Login to his account, Admin can add news under News and Events, Social Events, Ministry Highlights, Charity, Articles, Slum Ministry, Eunuch Ministry, Educate a Child, Blood Donation etc. Admin can also edit or delete the news if it is not needed.

II. Literature Survey

If Grace Ministry is done using manual methods then a person should maintain all the records in a book manually which leads to a lot of errors and which will take a lot of time too. Adding, editing and deleting different news and articles

and photos regarding ministry makes work complicated.

III. Implementation

Updating of the Saint of the day will be carried on and displaying the news Information about the latest achievements. Users can also post the details of the poor or ill people who are suffering from major Diseases in Android.

IV. Proposed System with Objectives

Proposed system benefits the admin, user since the work is computerized. The admin can get to Know about prayer requests, newsletters requests, register voluntary, donations for different services, Charity news sitting at Office. Users can get to Know News and Social Events, Articles, Prayer Center, Upcoming Projects sitting at Home. It offers more security to the data. Proposed system offers following benefits

V. Conclusion

Main objective of this project is to allow users to get information about retreat centers, request newsletter, request prayer , register voluntary, get finically help from donors, get help regarding blood donation which is stored in Database. This system is about managing the different types of request which are requested by users. Errors can be detected much earlier. Thus would be of great help to the users who are in need.

The application is designed in such a way that any further enhancements can be done with ease. New modules can be added to the existing system with less effort. In future this system can be designed as mobile/IOS.
